Summary

Results-driven IT professional with 7 years of experience in managing enterprise storage and backup infrastructure. Proficient in administering and troubleshooting Storage systems. Expertise in data protection, disaster recovery, capacity planning, and performance optimization. Adept at working in dynamic environments with a focus on reliability, security, and business continuity. Proven track record of delivering high availability storage solutions and efficient backup strategies to support mission-critical workloads.

Working closely and effectively with all levels of management to satisfy project and productivity requirements, offers logical, forthright thinking and able to provide effective solutions to solve difficult problems.

PROFESSIONAL SUMMARY

- Well adaptable to challenging environments, strong work ethics and commitment to work will well serve to achieve Client's objectives
- Knowledge and experience in Storage and Backup Infrastructures.
- Knowledge and experience in managing and administrating NetApp ONTAP, NetApp E-series Storage, ONTAP Performance, DELL Power store, Pure Storage, HP Storage and Brocade switches.
- Configuration of Volume pools, Policies
- Handling all Admin related tasks such as configuration, Implementation, creation, decommission etc.
- Resolving the auto-generated and customer generated tickets. Analyzing Root Cause Analysis (RCA) for the new issues.
- Monitoring the health status remotely and taking appropriate action if any Software or hardware issues found.
- Direct interaction with the clients and local authorities to resolve any issues.
- Contacting vendors via service requests or by raising chat to resolve issues.
- Identify and resolve the complex issues on a day-to-day basis, escalating if required to the relevant support area and senior management.
- Knowledge in SNOW ticketing tools and SLAs involved.
- Configuring Replication in Storage devices.
- Responsible to achieve highest level of customer satisfaction and drive the team towards the excellence by transferring Knowledge.
- Accustomed to working in fast-paced environments with the ability to think quickly and successfully handle difficult customers.

TECHNICAL SKILLS

- **Storage:** NetApp ONTAP , NetApp E-series, ONTAP Performance, DELL Power store, Pure Storage, HP Storage.
- **Network:** Brocade and Cisco switches

CERTIFICATIONS AND FORMAL TRAININGS

EMC -Information Storage and Management (ISM)

WORK EXPERIENCE:

Company: Cognizant.

Duration: July 2022- till now.

Serving as an Associate Storage Administrator at **Cognizant** for the last 2 years 11months, contributing to a shared services engagement under the project **Hybrid Smart Ops**.

Technology: NetApp, HP, Dell, E-series and switches.

Responsibilities:

- Administration of Storage and switches.
- Performing installation, configuring, creation and upgradation of Storage devices.
- Performing maintenance and capacity checks for the Storage environment.
- Working on various project implementations and providing storage solutions to the project teams.
- Attending various Project calls, DR calls, Daily Status Review calls etc.
- Maintenance of the storage daily and take actions depending on the storage health.
- Documentation of run-books and process related documents to enable for a smoother handoff.
- Technical discussions on the progress of the project.
- Performing decommissioning and other configuration changes when required.
- Coordinate with the vendor support for the issues related to hardware.

Company: Sutherland Global Services.

Duration: Feb 2021 to July 2022.

Served as a Technical Support Engineer at **Sutherland** for 1 year 5 months, providing support for **NetApp** and assisting clients with issue resolution, system optimization, and product guidance.

Technology: NetApp ONTAP and E-series, Brocade switch

Responsibilities:

- Troubleshooting software and hardware related issues.
- Resolving the auto-generated and customer generated tickets. Analyzing Root Cause Analysis (RCA) for the new issues.
- Checking health status remotely and taking appropriate action if any issues are found.
- Handle the user requests and complete them in the specified Time to meet the SLA targets.
- Responsible for resolving the tickets via email or any other communication medium.
- Direct interaction with the clients and local authorities to resolve any issues
- Identify and resolve complex issues on a day-to-day basis.

Company: Wipro Technologies.

Duration: June 2018 to Jan 2021.

Served as a Technical Support Engineer at **Wipro** for 2 years 7 months providing support for assisting clients with issue resolution, system optimization, and product guidance.

- **Project:** Dell EMC (June 2018- March 2020) as a technical support engineer.

Technology: Symmetrix and Connectrix (Brocade and Cisco FC (Fibre channel) switches)

Responsibilities:

- Troubleshooting software and hardware related issues.
- Resolving the auto-generated and customer generated tickets. Analyzing Root Cause Analysis (RCA) for the new issues.
- Checking the health status remotely and take appropriate action if any issues found.
- Handle the user requests and complete them in the specified Time to meet the SLA targets.
- Responsible for resolving the tickets via email or any other communication medium.
- Direct interaction with the clients and local authorities to resolve any issues
- Identify and resolve complex issues on a day-to-day basis.

- **Project: ASSABLOY** (March 2020 to Jan 2021) as a storage administrator.

Technology: DELL Unity, Brocade FC Switches.

Responsibilities:

- Administration of Storage and switches.
- Performing installation, configuring, creation and upgradation of Storage devices.
- Performing maintenance and capacity checks for the Storage environment.
- Working on various project implementations and providing storage solutions to the project teams.
- Attending various Project calls, DR calls, Daily Status Review calls etc.
- Maintenance of the storage daily and take actions depending on the storage health.
- Documentation of run-books and process related documents to enable for a smoother handoff.
- Technical discussions on the progress of the project.
- Performing decommissioning and other configuration changes when required.
- Coordinate with the vendor support for the issues related to hardware.

EDUCATIONAL QUALIFICATIONS:

- BCA (Bachelor of computer Application) From George Collage, Kolkata, West Bengal.
- Class 12th and 10th from Loreto st Mary's school (Board of WB)
